

CUSTOM RINGING

Know who the call is for without picking up the phone. Up to four people in your household can have their own distinctive ring. No additional equipment or wiring is needed.

ABOUT CUSTOM RINGING

- You can order up to 4 different phone numbers for your household, without any additional equipment or wiring.
 - Assign one of the phone numbers to each person who would like to identify their calls.
 - Each phone number will have a different sounding ring.
 - Each phone number can have its own listing in the White Pages too.
 - All the different rings will sound on every phone in the house. When it's your ring, just answer!
- If you work at home or get calls from the office, you can regain your personal time by not answering your “business” ring after hours.
 - A special phone number gives a youngster a sense of importance.

HOW CUSTOM RINGING CAN MAKE LIFE EASIER FOR YOU

Since Custom Ringing lets you know who the call is for:

- Avoid interrupting what you're doing unless it's for you.
- Make one number your business line, so that you can always answer that ring in a professional manner.
- Let your teenagers or roommates answer their own calls.
- Protect your privacy – with your own ring, only you need to know who's calling.

USING CUSTOM RINGING WITH OTHER QWEST FEATURES

Add Call Waiting to catch important calls while you're on the phone. With Custom Ringing, the Call Waiting tone is different for each Custom Number, so you'll know whether to interrupt your call.

If you have a home office, you can combine an Additional Line with Custom Ringing, and avoid tying up your business phone with personal calls – or vice versa. You can tell without interrupting your work whether it's your personal or business line ringing to better budget your time.

Optional services are not available in some areas.
